

UNIT MERINYU ELEKTRIK
ELECTRICAL INSPECTORATE UNIT

SYLLABUS FOR CHARGEMAN EXAMINATION – Updated 04/2014

1. CATEGORY L1	
A. THEORY	
<p>1.1 Electricity Ordinance.</p> <p>1.2 Electrical Rules 1999.</p> <p>1.3 Latest IEE Wiring Regulation or Malaysian Standard (MS).</p> <p>1.4 Fire Fighting System.</p> <ul style="list-style-type: none"> • Selection and operation of portable fire extinguisher. • Halon gas system and sprinkler. • Alarm system. <p>1.5 Protection Equipment In Low Voltage Installation.</p> <ul style="list-style-type: none"> • All kinds of circuit breaker (ACB, OCB, MCCB, MCB, ELCB, etc). • Safety switches. • All kinds of fuse: rewiring fuse, HRC, time lag fuse, etc.. • Oil dashpot. • Earthing. <p>1.6 Electrical Basic</p> <ul style="list-style-type: none"> • Power factor (p.f.) <ul style="list-style-type: none"> - definition and power factor calculation - effects of low power factor. - capacitor rating for power factor correction. • Voltage. • Current (DC circuit and AC circuit) • Power (kW, kVA, kVAR). • Resistor. • Capacitor. • Inductor. • Magnetism basic. <p>1.7 Transformer</p> <ul style="list-style-type: none"> • Construction, types, application, differences between other types of transformer. • Function of important parts in a transformer. • Overhauling. • Testing and commissioning. <p>1.8 Cable</p> <ul style="list-style-type: none"> • Cable selection. • - types, sizes, current rating, voltage drop. • Joints and terminations. • Damages on cable and damage analysis. • Usage of equipment to detect cable damages. 	<p>1.9 Underground Cable</p> <ul style="list-style-type: none"> • Types of cable, sizes, current rating. • Digging, excavation and cable laying, and other situations. • Cable jointing, phasing and termination • Associated control gears, feeder pillar, distribution boards. • Construction, operation and maintenance. <p>1.10 Motor and Controlling equipment</p> <ul style="list-style-type: none"> • Types of motor, application, differences and ways of operation. • Maintenance, fault detection and repair. • Starter including protection characteristics. <p>1.11 Battery</p> <ul style="list-style-type: none"> • Working principal. • Types, sizes, maintenance and charge system. <p>1.12 Measurement and Testing Equipment</p> <ul style="list-style-type: none"> • Introduction and usage of different types of measurement and testing equipment. <p>1.13 Air Conditioner</p> <ul style="list-style-type: none"> • Types of air conditioner. • Air conditioner components. • Operation and maintenance. <p>1.14 Main Switch Board Equipment Checking</p> <ul style="list-style-type: none"> • Earthing system, OCB, switch board, switching tripping equipment, partition, relay and pilot wiring, etc.. <p>1.15 Consumer Installation</p> <ul style="list-style-type: none"> • Design and types of consumer installation wiring. • Earthing. • Installation testing (testing procedure) • Neon lamp installation. <p>1.16 Street Lighting</p> <ul style="list-style-type: none"> • Installation, maintenance. <p>1.17 Grid Connected Photovoltaic (PV) System</p> <ul style="list-style-type: none"> • Requirement to install disconnect switch (isolator) outside the premises. • Knowledge of SESCO switching coordination operating practices.
B. PRACTICAL	
<ol style="list-style-type: none"> 1. Instrument and Measurement. 2. Switchboard Operation. 3. Motor Control. 	

2. CATEGORY L2	3. CATEGORY L3
A. THEORY	A. THEORY
<p>2.1 Low voltage Overhead lines, Underground cable laying & auxiliaries</p> <ul style="list-style-type: none"> • Types of poles, construction of stay wire • Types of cable, current rating. • Overhead line installation including tensioning, sagging and clearance limits. • Overhead line equipment like pole fuses, lightning arrestors, D bracket. • Installation and maintenance of overhead line equipment and others like feeder pillars and distribution boards. • Earthing. • Span length and poles location. • Street lighting. • Safety procedure when working. <p>2.2 Grid Connected Photovoltaic (PV) System</p> <ul style="list-style-type: none"> • Requirement to install disconnector switch (isolator) outside the premises. • Knowledge of SESCO switching coordination operating practices. 	<p>3.1 Low voltage generating stations.</p> <p>3.2 Synchronizing power generation and purpose of synchronizing.</p> <p>3.3 Factors related to synchronizing process.</p> <p>3.4 Synchronizing operation (in theory and practical).</p>
4. CATEGORY H1	5. CATEGORY H2
A. THEORY	A. THEORY
<p>4.1 Voltage Higher Than Low Voltage (up to 33 kV) Electrical Substation & auxiliaries.</p>	<p>5.1 Voltage Higher Than Low Voltage (up to 33 kV) System for all the items listed in category L2.</p>
6. CATEGORY H3	
A. THEORY	
<p>6.1 Voltage Higher Than Low Voltage (up to 33 kV) System for all the items listed in category L3.</p>
